

Preparing your Glasswasher or Dishwasher after lockdown

8 steps for success

During the lockdown, glasswashers and dishwashers will have been turned off and will need cleaning before being put back in service.

GLASSWASHER AND DISHWASHER CLEANING PROCEDURE

- 1 Remove filters/ arms/ jets etc, clean & refit
- 2 Check detergent and rinse aid levels
- 3 Check water and power are turned on
- 4 Flush boiler by filling the machine and draining
- 5 Fill and allow the machine to reach the correct wash temperature
- 6 Sprinkle a liberal amount of **Renovate Powder** onto the door or wash tank
- 7 Carry out several, long wash cycles. Open the door/hood carefully during cycles and scrub internal surfaces with a suitable cleaning brush
- 8 Drain down the machine & rinse.

SOFTENERS PROCEDURES

Manual type

Check water is turned on and regenerate as per manufacturers instructions.

Automatic and internal type

Check water and power is turned on. Check salt level and top up as required. Force a manual regeneration if possible.

Please follow chemical manufacturers' guideline & wear the appropriate PPE to carry out this process.

Glasswashers and Dishwashes do not like being Idle for any length of time. This can cause issues when re-commissioned back into service.
