

READY GET SET LET'S GO!

Our 3-step plan to support you to serve great quality beer from day one of re-opening.

The countdown to re-opening has begun, and the Avani team are here to support you to serve great quality beer from day one.

▶ READY

UP TO 10 WEEKS TO GO →

Are you 'beer-ready'? Take stock of the hygiene condition of your cellar, beer lines, glassware and bar equipment – in fact, all aspects that affect beer quality. It's likely that your bar has never been out of use for so long, so you'll want to make sure that everything is in pristine condition. This is the time to ensure you trouble-shoot any technical faults and get them booked in with your service provider.

With customers' taste buds being re-trained to appreciate bottled and canned beer - it's vitally important that your draught beer lives up to expectations.

▶ GET SET

2 WEEKS TO GO

This is the final countdown before re-opening and most of the hard work has already been done. Time to focus on range and temperature.

[See our Get-Set checklist here](#)

▶ LET'S GO!

LAST 3 DAYS BEFORE OPENING

You don't want any last minute surprises, and you'll have plenty of other non-beer related tasks to deal with. Time to connect up your beers and conduct quality checks.
